First of all, respect all of you for the bravoure you have, the only way to fight this deep state, this ubiquitous mafia that manipulates the financial markets, governments and our own lives is to unite together!

together we are unstoppable and I feel blessed to see so much cohesion, this group is magical and can change the world!

you have the wrong strategy! since 1971 the dollar and all currencies are no longer backed by gold or silver, they can print as many banknotes as they want without compensation!! buy as many GME shares as you want, they just print more dollars and invest them at the lower price, you can't win at their own game with their rules! it's a double loss because investors lose money, and all people lose money with inflation, the only way to change this is:

PRECIOUS METALS BECAUSE THEY CANNOT PRINT INFINITELY

Silver in particular because he is becoming very rare with few ground reserve and he is in great demand by industry, you have to buy physical, it is the only thing that these markets disconnected from reality can not manipulate.

Only if every people of this sub buy 10oz (10M X 10oZ) is enough to empty the ENTIRE SILVER MARKET, paper loose value, métal don't, store your time and energy on metal, not paper printed by criminal and slavers!
