Body:

Before we start, go read u/criand latest DD. (I suck at links, formating, ect )

After reading, a question popped into my head. What if RC told the SEC about a dividend yesterday, triggering the MOASS (

I in the background? (Hence the "killed kenny" post \*fucking legend\*) If you count the days, 10 trading days is right around the time criand's DD predicts the next run up to begin. This would obviously be huge. It would also make sense for shitadel to be pulling all it's resources to combat this (hence junk bond sales to the fed). I would guess they would know about it once the sec does?

Edit: shitadel and junk bonds may be debunked. Doesn't affect my theory.

Anyway, don't listen to me I wear hats made of crayons, and chew tin foil. Wait, never mind.
