Disregarding my oersonal opinion about Elon Musk. Perhaps he could be of use here. As he is a large owner of twitter and while the DTCC is not a publicly owned company they absolutely should be held accountable and be transparent as they hold peoples stock and indirectly work for the public.

An opinion of mine in general is that companies (not individuals due to bullying) should not have a censor button. They should be held responsible for bad practices and have to answer or suffer bad reviews on social media. An easy way to expose legal or moral wrongdoings.

Please if you have twitter (i dont). Make Elon Musk aware of this being an issue. I do believe he has power to influence this. At least on twitter

English is not my first language etc.
