Hello you beautiful apes!

didnt think id just gave up with my archiving duties did ya?

Well here is the next iteration of my data.

i realised that even with IPFS, even with all the crazy amounts of data that i have backed up, its not much fucking use is it, if no one can search for it? so i made a database and its now live as a functional powerbidashboard - a public one soyou can share it elsewhere, and you **DONT** need a powerbi account to view it.

This is the beginning of what I want to do - i want to make sure that EVERY ape who wants to find the DD on swaps theory, or mayo mentions, or whatever else, they can find it.

here it is...

method of access 1- apehistorian.com \- first link you see on the main page

method of access 2: this beautiful powerbilink: you SHOULD be able to access it without logging in at all - here is the link (yes thats what powerbi links look like, i cant make it look any different): [https://app.power bi.com/view?r=eyJrIjoiMDljZTA3NGUtMjJiYS00YjQwLTk5MTktM2VlNWQ5ODViYjM5IiwidCI6Ijl4YzVlNGJ kLTVkNmMtNGI1OS1hMGU5LTBhMjQ0Mzk4OTNiZSJ9](https://app.powerbi.com/view?r=eyJrIjoiMDljZT A3NGUtMjJiYS00YjQwLTk5MTktM2VlNWQ5ODViYjM5IiwidCI6Ijl4YzVlNGJkLTVkNmMtNGI1OS1hMGU5 LTBhMjQ0Mzk4OTNiZSJ9)

so if you were to go this page you should see something like this: for all your gme searching needs.

[desktop version](https://preview.redd.it/m0jvied194y81.png?width=1778&format;=png&auto;=webp&s;=e 4bfede95d595fec40b601555937692c2d740d12)

[mobile version- yeah it works everywhere](https://preview.redd.it/z73i7ls394y81.png?width=1389&format; =png&auto;=webp&s;=c49f68ac7d8c7505d48bafee0a40281ec92b0aa5)

for those who havent used powerbi before, please note that you get additional context menus as you mouse over the elements - they will be in the top right most frequently.

note you ~~also have hamburger menus that allow you TO EXPORT the data, but only 150k rows at a time - but still, that should let you quite easily export a shitton of posts as you can query them.~~ apparently this doesnt work if you publish an app on the web - i am looking for a workaround -

Changelog and best practice:

do not try to search the entire database for all mentions for "mayo" - especially if you do it via the "post content" search bar - aka the entire posts content - it is just going to take ages to process. filter by flair, or time period or author first.

if you want to search for specific posts, do try to narrow them down by flair, data, author, or title - the filters

are dynamic so if you want to search only for posts made in the last week or two - filter for that first, then filter for the rest of the conditions.

dont forget to clear the filters from the text search or drop down menus - especially if you think a post should exist but it doesnt - a perfect example is if you search for all authors with the letters "cr" you wont find any atobit or happyegg posts.

functionality that works:

1. full post search, with subreddit filtering (this is all subreddits so be warned)
2. full filtering ability by subreddit,author, text title (or part of it) fulltext content (or part of it), date range, and flair.
3. MOST posts from march 2021 to now. definitely not all posts-see below

functionality that WILL work:

1. full categorisation (see columns that are named as "coming_soon")
2. this is NOT all posts - the bigger database is coming in the second tab (work in progress, wip for now).
3. all posts from nov 2020 (yes from the UUSB sub as well) to now - in a seperate page (which is now made but hasnt yet been done)
4. FULL comment search (this could be tricky as i will need to figure out how best to approach it)-its likley i will have to get rid of all comments that have scores of less than 5 or are "this is the way" and similar.
5. a full database of memes, by time period. (you should already be able to do this with some clever filtering though).

enjoy, and let me know if this works decently well for your research, the dd hunts, everything. it took a little bit of time and wasnt free - and no i am not asking for donations. but you have it for at least 3 months as ive earmarked funds towards this - but if there is insufficient traffic ill have to consider going down a cheaper route, sorry fellow apes and appetttes.

Hedgies are so fucked.

some fun searches:

either in title or post content: swaps, swap theory, cycle, cycles, sec, finra, rehypothecation, basket, cellar boxing, griffin, point72 and so on.

maybe do try "mayo man"

search away fellow apes

PS - you can press CTRL and make multiple selections fyi
