Title: I hosted a Balkan meme on GME proxy servers and you can host anything that you want including gore videos. You may want to pull your money before GME goes bankrupt on copyright cases.

Well, I love my 6 y.o accounts so I have to say

THIS POST DOESNT TELL YOU TO UPLOAD ANY CHILD SEXUAL HARASSMENT VIDEOS OR ANYTHING! THIS POST IS FOR EDUCATIONAL INTENTIONS, FOR ALL OF YOUR STUPID ACTIONS, MY ACCOUNT, AND THIS POST ARE NOT RESPONSIBLE.

Some of you mfers will probably get notification from other subs, but I will post here so in case you can see how shit this blockchain technology is, and it is not a new thing that was invented like YEARS ago.

GME NFT proxy servers are public. Follow these steps to host anything you want, and it will not get deleted till GME detects it, there is probably gore, child harassment, copyrighted files, and my Romania wild west Balkan meme right there

* Thanks to my random internet friend that I made 5 minutes ago, I learned this shit is very simple.
* [Go here](https://anarkrypto.github.io/upload-files-to-ipfs-from-browser-panel/public/)
* Ping server, upload anything you want.
* Take hash value from JSON.

* and congratulations, you have your mark on GME proxy.

There are already dozens of ROMs hosted on the site, with dozens of copyright cases on the way. Stop investing further, because no one knows how far this shit will go, how serious this shit will be (with the ability to host everything in GameStop servers). Gore and other sensitive things are serious crimes, and even hosting it on corporal servers can lead a corporation to death.

love you. -davlumbaz.
