So looking for some advice as I am super smooth and want to get my GME Crypto Wallet setup. I have already moved all of my loops to my Loopring L2 Wallet. I am trying to activate my GME wallet and tried to send \~95 loops from my L2 to my GME wallet (they are currently just stuck in pending and have not moved). I have tried to use both Ramp (blocked based on state I live in) and Wyre (transaction gives an error and never completes, I have tried multiple cards). What is the easiest way I can activate my GME wallet at this point? Do I need to send ETH first to activate the wallet? If anyone is willing to help I can send you loops to cover the cost I know the fee is low I just cant figure out how to do it! Will also post this in Loopring subreddit not sure best place to get help on this.
