!DRSBOT:RESET!

!DRSBOT:2499!

2499 gamestop shares. I have also gifted several gamestop shares to friends and family pre-split. I gifted several so those gamestop shares are not counted because I lost track of how many I gave away. I am thinking of gifting shares via computershare again since each share is cheaper now.

Link also to my art collection sample. I am not yet approved as a gamestop nft.gamestop.com seller.

I listed it in loopexchange but now I am seeing derivatives of my art collection even if I have not fully released it.

Even my second art collection, 4 Pets Play, I saw something vaguely similar to it. So maybe it was just a coincidence. I wanted 4 Pets Play to be released around the split dividend to stay with the 4 for 1 theme, but alas I am still waiting to be approved in the nft.gamestop.com marketplace. As for my third collection, I have toned it down and I think I have found some sort of utility. I am struggling with it currently. It is hard to make. I have not leaked it yet. I am avoiding using loopygen because even though I think it is great, I got paranoid and thought maybe they got a sneak peek of what I was making before I even released it. But I still like loopygen
