Is_self: True

So... a sign of just how "experienced" with Reddit I am: I just discovered I've been using Old Reddit to write posts, and had no idea that New Reddit was a thing until the Writers Block post. ■■■■■

Now that I've fixed that little knowledge gap and have access to much more powerful, faster content creation, I'd like to gauge sentiment a bit and "get to know the audience" for future educational/sector/securities analysis posts. This isn't just for me, but for everyone looking to start dropping some quality OC in here.

I'll set it to run through the weekend.

What best describes you?
