My brain ran out of wrinkles long time ago. And this question is completely hypothetical and I will probably sound stupid because I have no technical background whatsoever.

What would happen if somebody decides to hack the system or systems that are allegedly lowering the price of GME. The HFs wouldn't be able to denounce it as it would prove that they are indeed sabotaging the market.

Again I am not a hacker or any sort of financial advisor, I am just an ape with a stupid question.
