I'm currently working on my regular pre-earnings DD and I thought this would be a great discussion topic! I'll be posting in the next couple days, but until then, what do you think GME Q4 FY2021 earnings are going to be?

[GME Q4 FY2020 earnings](https://news.gamestop.com/news-releases/news-release-details/gamestop-reports-fourth-quarter-and-fiscal-2020-results) were $2.122B revenue and $1.19 EPS. FY2020 had net sales of $5.090 billion compared to $6.466 billion in FY 2019.

Here is what I've found from MSM so far which is all terrible (I will be covering the details why in my following DD post):

[Zach's estimates](https://etfdailynews.com/news/2-19-billion-in-sales-expected-for-gamestop-corp-nysegme-this-quarter/): 2 analysts

- Revenue: $2.23B and $2.15B for a consensus of $2.19B
- didn't want to pay for EPS estimates

[Seeking Alpha's estimates](https://seekingalpha.com/symbol/GME/earnings/estimates): 4 analysts

- Quarter Revenue: low of $2.11B and a high of $2.38B for a consensus of $2.22B
Annual Revenue: low of $5.86B and a high of $6.13B for a consensus of $5.97B
- Quarter EPS: low of $0.25 and a high of $1.25 for a consensus of $0.84
- Annual EPS: low of -$2.32 and a high of -$1.22 for a consensus of -$1.69

[Marketbeat estimates](https://www.marketbeat.com/stocks/NYSE/GME/earnings/): 2 analysts

-couldn't find revenue estimates
- Quarter EPS: low of $0.28 and a high of $1.25 for a consensus of $0.77
- Annual EPS: low of -$1.29 and a high of $0.68 for a consensus of -$0.31

As you can see there is a very large difference between the three MSM I referenced and last quarter estimates didn't take into account a lot of things imo. So what do you think earnings will be?
