Hey everyone - your favorite seal is back with a new GME Mastersheet!

You will find 2 premade charts and an extended amount of data.

The first chart contains the 30 day moving average for

\-Accuracy

\-Short Volume Ratio Intra Data \[Nr. of shorts reported on all exchanges I used / (Volume reported on these exchanges/100) \]

\- and Short Volume Ratio Total Vol \[Nr. of shorts reported on all exchanges I used / (EOD Volume reported on Yahoo for the day/100) \]

and GME Close Price reported on Yahoo.

The second chart I made for you contains 30 days moving average of FTDs as % of daily traiding volume and total number of FTDs on that day.

https://preview.redd.it/kb0hrn5zwsh81.png?width=5957&format;=png&auto;=webp&s;=086319c67238e5da0981935d9d02cfe3fded084b

There is one day where FTDs were around 120% of daily trading volume, I marked it below.

https://preview.redd.it/jg3sjje3xsh81.png?width=5957&format;=png&auto;=webp&s;=85acc334696236f73c9647abb26d62379e4c80aa

I further added an "Error" section that displays the issue I found in the data - i decided to use the later reported data for this exchange - just happened for 2 dates.
